Summary

B.Tech graduate in Electronics and Computer Engineering (VIT Chennai, 2026) with hands-on experience in Agentic AI, cloud architecture, and full-stack development. AWS Certified Solutions Architect and Salesforce Certified Platform Developer with production experience building automated data pipelines, Tableau dashboards, and Next.js applications as a Data Science Intern at Schneider Electric. Skilled in Python, LangGraph/LangChain, and cloud platforms (AWS, Salesforce, SAP), with applied ML projects spanning fraud detection and healthcare risk stratification. Proven leadership managing a 150-member technical club, driving cross-functional AR/VR initiatives from concept to execution.

Education

VIT Chennai

B.Tech, Electronics and Computer Engineering

2022 – 2026

CGPA: 8.19

Skills

Programming: Python, Java, JavaScript, TypeScript, C/C++, HTML, CSS

Web/App Dev: React, Next.js, MERN Stack, Django, Flutter, Kotlin

Cloud: AWS, Salesforce, SAP

Agentic AI: LangGraph, LangChain, MCP

AI/ML: TensorFlow, Scikit-learn, Azure ML

Business Intelligence: Tableau, Power BI

DBMS: SQL, MongoDB, Aurora, Redshift

Other: Blender, Unreal Engine, Fusion 360, Qiskit, PTC Creo, Resolve

Certifications

IBM RAG & Agentic AI Certification (Coursera) – Aug 2026

AWS Certified Solutions Architect – Associate – May 2026

SAP Certified Integration Developer – Jul 2026

Salesforce Certified Platform Developer 1 – Mar 2026

Business Analyst Experience Certification (Finlatics) – Jan 2023

Experience

Schneider Electric

May 2025 – Dec 2025

Data Science Intern – Global Supply Chain, India

- Developed and deployed a centralized web application within the Autonomous Planning Program to streamline supply parameter management across the EA Region using Next.js
- Built Agentic AI Proof of Concepts for Supplier Lead Time Estimation
- Developed interactive Tableau dashboards to track supply chain KPIs
- Created a SharePoint site for HR India's Employee Onboarding

Projects

Causal GETNet for Fraud Detection

Jan 2026 – Apr 2026

- Designed a Causal Graph Enhanced Transformer with heterogeneous feature embedding, invariant risk training, and HeteroConv convolution layers to assess fraud risk on the IEEE-CIS dataset

Hybrid QML for Cardiovascular Risk Stratification using PPG Signals

Jul 2025 – Dec 2025

- Combined Quantum Machine Learning with traditional ML methods on a clinically annotated PPG signal dataset to identify and classify cardiovascular disease risk

Leadership

Augmented & Virtual Reality Club, VIT Chennai

Nov 2024 – Dec 2025

Vice President

- Managed a club of 150 members across Management, Marketing, Technical, Design, and 3D Modeling verticals
- Led development of a 3D model of the college campus using Blender and Unreal Engine
- Hosted AR hackathons, educational talks, and workshops, alongside non-technical events such as VR gaming and render competitions, to grow community engagement
